

## Challenges & Awards

In order to promote and award Sustainable Chemistry innovations and innovators, ISC3 organises an annual Innovation Challenge and a Corporate Challenge. For more information visit our website!

## Events for Start-ups

From Investor Forums and matchmaking sessions to trade fair showcases and expert workshops, we create spaces where Sustainable Chemistry start-ups can grow. Our events address both business development and sustainability-focused topics relevant to scaling innovative solutions.

## Are you interested in being part of the Global Start-up Service?

# What is the ISC3 Global Start-up Service about?

Growing a business in the Sustainable Chemistry (SC) space is a complex process, which involves considering ecological, economic and social issues from early on.

## General Support

### Services for all onboarded GSS start-ups:

- Online Library:  
Including the ISC3 Sustainable Chemistry Toolbox, as well as videos from our previous workshops
- GSS Changemakers LinkedIn Group
- Workshop invitations & voting on future topics
- Events and Challenges invitations
- Networking

## Support Plus

### Tailored support for a selected group of start-ups including:

- Pitch Training
- Deep Diving & Masterclass in SC
- Invitation to pitch at the ISC3 Investor Forum or Industry Matchmaking Event
- Individual consultations to improve your SC profile/sustainability/business development topics, etc
- Matchmaking with Mentors & Experts
- Visibility via website, PR and social media

Our ISC3 Global Start-up Service (GSS) is there to help you in this undertaking. We address Changemakers along the entire innovation chain, and offer them a wide range of services tailored to their needs.

## Ready to become a Sustainable Chemistry Changemaker?

Addressing global challenges requires a fundamental shift in the chemical industry and related sectors. Sustainable Chemistry stands for a holistic approach that integrates sustainable technologies, processes and products across supply chains. Its goal is to respect ecological limits, strengthen social responsibility and support long-term competitiveness. Sustainable Chemistry is not a vision for tomorrow – it is a key foundation for a sustainable future.

### Join us and accelerate your innovation!

Whether you're closing material loops, reducing emissions, or turning waste into valuable resources, if your start-up creates sustainable impact, we want to hear from you! Our Global Start-up Service supports founders in Sustainable Chemistry and related fields with tailored guidance, global networking opportunities, and expert resources to help you grow.

### Sustainability

We help start-ups assess and enhance their sustainability impact across all stages

### Chemistry

We address exclusively the needs of chemistry-related start-ups

### Global Reach

We create an enabling environment on a global basis

### Tailored Support

We provide tailored support based on start-up needs
